(entretien à partir des travaux et activités effectués pendant l'année de terminale dans la discipline non linguistique et ouverture européenne)

Durée de l'épreuve : 20 minutes

Préparation : 20 minutes

CORRIGÉ SUJET n° 1

<http://images.google.uk>

Situation:

You are a car body worker at Webbs Auto Body Repairs in Dublin, Ireland. You take charge of Mr Dunkan who drives into the garage with his car.

He explains that he was parking his car at the supermarket and he couldn't see a concrete stud. He hit it on the right front side.

He is worried and wonders if he can keep on driving with his car and he wants his car fixed.

You ask Mrs. Dunkan to drive the vehicle into the body workshop.

Your Tasks

- 1) Explain what you need to check if the bumper can be kept or needs to be changed. (Document 1 page 2/2). Explain why it is important to have a bumper in perfect condition.

So I can fix the bumper at a lower cost if:

- **Bumper mustn't be cracked or broken**
- **Fastening clips mustn't be broken or damaged**
- **There must be no large dents on the bumper**
- **No element or no part of bumper shall be missing**
- **bumper crossbar mustn't be deformed or displaced**

The bumper is a safety element to protect people in the vehicle but also outside people such as pedestrians or cyclists.

When it is damaged (cutting, broken, deformed crossbar) it is no longer effective and becomes dangerous

- 2) You have noticed that the bumper can be retained. Explain all the steps of the repair.
(Document 2 page 2/2)

Steps to repair and paint a bumper

- **Clean and degrease the bumper**
- **If it is necessary, mix the adhesive and repair cracks. Sometimes, you need to grind a « V » to put correctly the adhesive.**
- **If there are small dents, you can heat lightly the plastic to push it back.**
- **Spread the plastic filler and let harden.**
- **Sand the bumper with sandpaper grade P200 to grade P6000**
- **Apply a specific plastic primer**
- **Paint the bumper without forget to protect other car parts.**
- **If it's necessary, apply a varnish.**

- 3) When disassembling the bumper, you notice that the fog light is cracked. Explain the steps to replace it.

It's easy to change fog light.

- **To work safely, disconnect the battery**
- **Disconnect the fog light plug**
- **Remove the light by splitting the fastening clips**
- **Put the new light.**
- **Connect the plug and reconnect the battery**
- **Check that the fog light works correctly**
